Background:	cerebellar degeneration related protein 1(CDR1) Homo sapiens Autoantibodies directed against the protein encoded by this intronless gene have been found in some patients with paraneoplastic cerebellar degeneration. The encoded protein contains several hexapeptide repeats. [provided by RefSeq, Jan 2010],disease:CDR1 is one of the target molecules recognized by autoantibodies in patients with paraneoplastic cerebellar degeneration.,sequence caution:Frameshifts in positions 134, 176.,tissue specificity:Brain; predominantly expressed in normal neuroectodermal tissues and in certain malignant tumors.,
