

| | |
|-----------------------|--|
| Product name: | CHIKV Spike glycoprotein E1 Rabbit Polyclonal Antibody |
| Cat number: | ABN60085 |
| Conjugate: | Unconjugated |
| Size: | 100µL |
| Clone: | Polyclonal |
| Concentration: | 1mg/ml |
| Host: | Rabbit |
| Isotype: | Rabbit IgG |
| Reactivity: | Chikungunya virus (strain S27-African prototype) (CHIKV), Chikungunya virus (strain Nagpur) (CHIKV), Chikungunya virus (strain 37997) (CHIKV) |
| Applications: | WB 1:500-1:1000 IHC 1:50-1:100 ELISA 1:1000-2000 |
| Purification: | Affinity Purified |
| Form: | Liquid |
| Buffer: | 0.01M PBS, pH 7.4. |
| Storage: | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles. |
| Background: | Chikungunya virus (CHIKV) is an arthropod-borne alphavirus that causes Chikungunya fever, a re-emerging disease characterized by high fever, rash, and arthralgia. The E2 envelope glycoprotein is a structural protein that forms heterodimers with the 20 glyr membrane. Mutations in this gene have been associated with a form of mitochondrial respiratory chain deficiency known as Leigh Syndrome. A pseudogene has been identified on chromosome 3q29. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jun 2014], res E06881.1 |
